Protecting track workers should never slow down rail operations. Safetech Fence is a patented railway safety system designed to secure temporary work zones faster, safer and at a lower cost than traditional fencing solutions. Built specifically for track workers and rail infrastructure contractors, the system can be installed quickly by a small crew, up to 100 meters in under 10 minutes, without any excavation or the use of heavy equipment.

SAFETECH FENCE

THE FASTEST, SAFEST AND MOST COST EFFICIENT RAILWAY SAFETY BARRIER WORLDWIDE

Trusted by Deutsche Bahn and leading European rail operators, Safetech Fence helps reduce project downtime, minimize operational risk and lower total cost of ownership compared to conventional safety barriers. The system is fully certified according to European rail standards (EN 16704-2-2) and is already deployed across major rail networks in the world. Ideal for track maintenance, rail lines, temporary work zones and night operations Safetech Fence combines safety, speed, compliance and efficiency in one smart solution. Please contact us for a Safetech Fence demo at your site.
